

Arotech's Advanced Electronics Division Acquires Advance Circuit Technology

ANN ARBOR, Mich., December 20, 2021, -- The Arotech Corporation announced today that its Advanced Electronics Division (AED) acquired Advance Circuit Technology (ACT), a privately held corporation in Rochester, NY. ACT brings new and synergistic capabilities to Arotech with their mission critical printed circuit board and microelectronic assemblies technologies.

"The addition of Advance Circuit Technology expands our electronics manufacturing service capabilities and dramatically increases our operational capacity. This will allow us to meet the growing demand from our existing defense, communications, and medical market customers" said Matt Bakker, President of the Advanced Electronics Division.

About Arotech Advanced Electronics Division

Arotech's Advanced Electronics Division (AED) provides high-end defense electronics and power distribution solutions primarily for the defense and medical markets with development expertise across a variety of electronic assembly design and build disciplines. The Division has been recognized annually for performance and quality on its complex electronics manufactured systems including a 5-Star rating with Raytheon the past two years.
